

Julian Michael Mayo de Leon

Mechanical Engineer

Highly motivated Mechanical Engineer with an educational background in Aerospace Engineering combining technical expertise with a passion for continuous learning. Committed to expanding engineering skills and leveraging cross-disciplinary knowledge to drive innovation.

EXPERIENCE

Goddard Technologies Inc., San Diego, CA

Mechanical Engineer II

November 2025 – Present

- Performed cost reduction engineering redesigns across the entirety of an industrial computer vision warning system.
- Led engineering design and decision meetings for various mechanical systems across multiple projects for cost-reduction and producibility improvements.
- Developed a Python script that employs a spreadsheet of coordinates to generate Robot Arm scripts for quick deployment of robotic screwdriver systems.
- Assisted with the creation of initial knowledgebases of new company wide Product Data Management (PDM) systems
- Designed, conducted, and documented software verification testing protocols for a Computer Vision based Total Knee Arthroplasty surgical system.

Mechanical Engineer I

November 2023 – November 2025

- Supported launch of new client relations by participating in initial project strategy meetings with the client on site.
- Detailed hundreds of technical drawings, using GD&T, across multiple, multi-million dollar industrial automation robotics projects.
- Oversaw Engineering Change Orders (ECOs) throughout the lifecycles of hundreds of parts and assemblies for proper documentation and management.
- Led and completed a self taught robotics project to program a robot arm to follow a manually placed target in real time utilizing Arduino controlled Range Sensors.

MadCap Software, San Diego, CA

Technical Customer Support Specialist I

June 2022 – November 2023

- Applied strong technical knowledge and troubleshooting skills to diagnose and resolve complex customer issues across a wide range of software and hardware platforms.
- Regularly recognized and awarded for resolving the highest number of tickets each month, demonstrating a commitment to exceptional customer service and efficient problem-solving.
- Proactively identified trends in customer issues, contributing to the development of knowledge bases and self-help resources to empower customers to resolve common problems independently.

SKILLS

Software:

Solidworks (CSWP)

Fusion360

Python

Arduino

FEMAP

NASTRAN

MathWorks MATLAB

LabVIEW

Microsoft Office Suite

Manufacturing:

FDM 3D Printing

Machining

Soldering

Sheet Metal

Personal:

Creative Problem-Solving

Adaptability

Attention to Detail

Communication

Bilingual: Tagalog

EDUCATION

San Diego State University

Bachelor's of Science:
Aerospace Engineering

May 2021

San Diego, CA
